An issued record preserves submitted information. It is not a grade or proof of comprehension.

What do you understand about the work and finish line?

What I did was to learn more about game development and what are the most important step to take to success in it solo or in a team.

What will you contribute? Name a task or useful capability.

I bring to the team is my problem solving skills and the help of understanding concepts. By that and the leadership of the leader and can go far above the stars into game development and other problems ahead of us and the team.

What needs research, support or practice?

What I still need to learn is the commination needed for better and stronger teamwork.

Your available work times and preferred contact method: Discord, email, text, classroom or other. Keep private addresses/numbers outside public exports.

Preferred contact: Text

List your project tools and why you need them.

The most used tool would be AI. The reason why is that AI can find errors us humans cannot find, so with the help of AI it can help us shoot above the sky and became a better team.

Required: name the AI you will use, its project task and how you will verify its output. Use course-provided/shared or approved local access if needed; no personal or paid AI account is required.

AI: ChatGPT

Task: find errors that myself cannot find and give ideas on how to fix them.

Verification: By having a history input of its actions
